

DRN's Managed Online Backup

DRN is your key to worry-free computer network operation and data storage

What is your business doing to protect your computer files including financial and tax records, customer contacts, orders and employee information? What would happen to this data in the event of hardware failure, human error, theft and viruses or natural disasters such as floods and fires? With Managed Online Backup from DRN, you never need to worry about threats like this again.

Our Managed Online Backup will keep all of your computer files safe and available to you via on-demand recovery in the event of a disaster. They are also managed and monitored by DRN technicians who review reports daily to make sure all systems are functioning correctly.

Online data storage – 30¢/GB (plus licensing fees)

** 10GB minimum*

Licensing for a single computer - \$2.00

Licensing for multiple computers or servers - \$7.00

Continuous backup

DRN's remote online backup continuously monitors your files and automatically backs them up whenever they change. There's nothing to remember to do — simply set it and forget it.

Secure offsite storage

Your data is encrypted before it leaves your PC, then is stored offsite in a state-of-the-art data center located at DRN. Files are encrypted with the same security that banks and credit unions use — 256-bit encryption — then safely stored in a remote location.

How much will 50GB store?

- 500,000 word documents or
- 14,000 photos or
- 12,000 music files
