Managed Online Backup

ReadiTech is your key to worry-free computer network operation and data storage.

What is your business doing to protect your computer files including financial and tax records, customer contacts and orders, and employee information? What would happen to this data in the event of hardware failure, human error, theft and viruses, or natural disasters such as floods and fires? With Managed Online Backup, you never need to worry about threats like this again.

Our Managed Online Backup will keep all of your computer files safe and available to you via on-demand recovery in the event of a disaster. Files are encrypted with the same security that banks and credit unions use — 256-bit encryption — then safely stored in a remote location. They are also managed and monitored by DRN technicians who review daily reports to make sure all systems are functioning correctly.

CONTINUOUS BACKUP

DRN's remote online backup continuously monitors your files and automatically backs them up whenever they change. There's nothing to remember to do - simply set it and forget it.

SECURE STORAGE

Your data is encrypted before it leaves your PC, then is stored off-site in a state-of-the-art data center. Files are encrypted with the same security that banks and credit unions use — 256-bit encryption — then safely stored in a remote location.

PRICING:

- Residential \$2.95 + \$0.20/GB
- Business \$7.95 + \$0.20/GB

How much will 50 GB store?

*500,000 word
documents or
14,000 photos or
